

vNext Beta

Assessment Progress

Jan 2024

History

- Tagged Beta release received 2023-12-17
- Test deploys have been made (AWS)
 - Initial resource allocation was insufficient requiring iteration.
- Assessment framework shared with community on 2024-01-04
 - Feedback received and integrated
 - NFRs (Mojaloop Invariants) since added along with other more complete and stringent requirements as we look towards production quality

Current Status

- Community (2 contributors) review against the framework complete and feedback received.
- MFL staff continuing to review against the framework.
- Community members continuing to contribute to development (bug fixes)
 - THANK YOU!
- Review generated backlog items being added while reviews ongoing to enable continuing development,
- Mojaloop Foundation Engineering Director, James Bush, appointed as interim workstream lead until transition manager starts.
- Presentation of report likely to slip to Feb 2024
